Eric C. Lambart

1405 Broadway ⋄ Santa Cruz, California ⋄ 95062
(831) 588-7433 ⋄ resume (at) nomeaning (dot) net

OBJECTIVE:

Stimulating and *challenging* employment in software design and development, in an environment that allows and rewards initiative, creativity, hard work, and an eye for detail.

COMPUTER EXPERTISE:

- Software Development: JAVA, C/C++, SQL, JSP, PHP, (D)HTML, Javascript, CSS, XML, Pascal/Delphi, PERL.
  Some experience with COBOL, FORTRAN and x86 Assembly.
- Operating Systems: Skilled use and management of Linux/UNIX, DOS, MS Windows (*all versions through XP*) and MacOS.
- Hardware: Extensive PC and some Macintosh experience: Networking, troubleshooting, upgrading and other maintenance.

GENERAL ABILITIES:

Excellent English writing and editing skills. Good verbal communication skills in one-on-one interactions, as well as group presentations. Can read, write and speak Italian and German fluently (Spanish needs practice). Very quick learner yet patient teacher.

EDUCATION:

- B.S. degree in Chemistry, with multiple honors,
  University of California at Santa Cruz (1995).
- A.A. degree in Computer Programming, with honors (at age 15),
  Santa Monica College (1988).
- Intensive foreign language studies and residence in Europe.

SIGNIFICANT EMPLOYMENT EXPERIENCE:

- **October 2002 - Present: *TriAxial Data Systems.***
- **February 2002 - June 2002: *Stratos Systems* and *Ymedia Corp.***
  Web development contracts (using PHP, JSP, SQL, DHTML, CSS, Java/ECMAscript, etc.).
- **February 2001 - April 2002:**
  Software Engineer, *Giavaneers*, Santa Cruz.
  Java and C/C++ programming. Worked with SQL, JNI, JavaMail, TCP/IP sockets, GUI development and more under Linux and Windows: Among other projects, helped develop the embedded, JAVA-based on-screen user interface for a web-ready, next-generation plasma display television system, as well as working on an Integrated Development Environment (IDE) for programmable ICs.
- **February - November 2000:**
  Software Engineer, *macroplay.com*, San Francisco.
  Principal JSP (JAVA) engineer at a sports-oriented, still-operating internet startup. Working with a small yet very talented team, coded the front-end for several web applications (including an e-commerce system) and eventually took on some responsibilities for developing and maintaining the back-end (using EJBs and Oracle SQL).
- **January 1999 - November 1999:** Contracting work in Italy:
  - *@all.it*, Milan: Internet development and programming.

- ° *All'Informatica Shop*, Milan: Technician for retail computer store.
  - ° *Digivision*, Milan: Hard/software demonstration and user training (in Italian) of PC-based digital video editing systems.
  - ° *Acquarelli Video*, Florence: Digital video production, web design.
- **August 1997 - October 1998:**
  Self-employed, Bay Area.
  On-site service technician, facing ever-changing troubleshooting challenges that required rapid and independent discovery of solutions to meet customers' often-critical computer needs. Nearly all customers obtained via personal referral/recommendation.
- **May 1993 - October 1998**:
  Stratos Systems, Santa Cruz.
  On-site service technician for large computer store, with the same job description as above. Customers often insisted upon my personal attention, even if another may have been available more quickly.
- **December 1990 - September 1992**:
  Employed in non-computer related fields.
- **1986 - 1990**:
  Owner/founder, *Cavan Int'l*, Los Angeles / San Diego.
  Application design and development in Pascal and Assembly Language. Profitable sales of communications and other software.
- **April 1985 - May 1988**:
  Zebra Computer Products, Santa Monica.
  Systems consultant, technician, contract programmer, and assistant service manager.
