

Features

Presence as an icon

- preventing the appearance of log messages on presence changes - online, offline, away, busy;
- presenting these states with an appropriate icon (presence indicator placed right next to the avatar) instead.

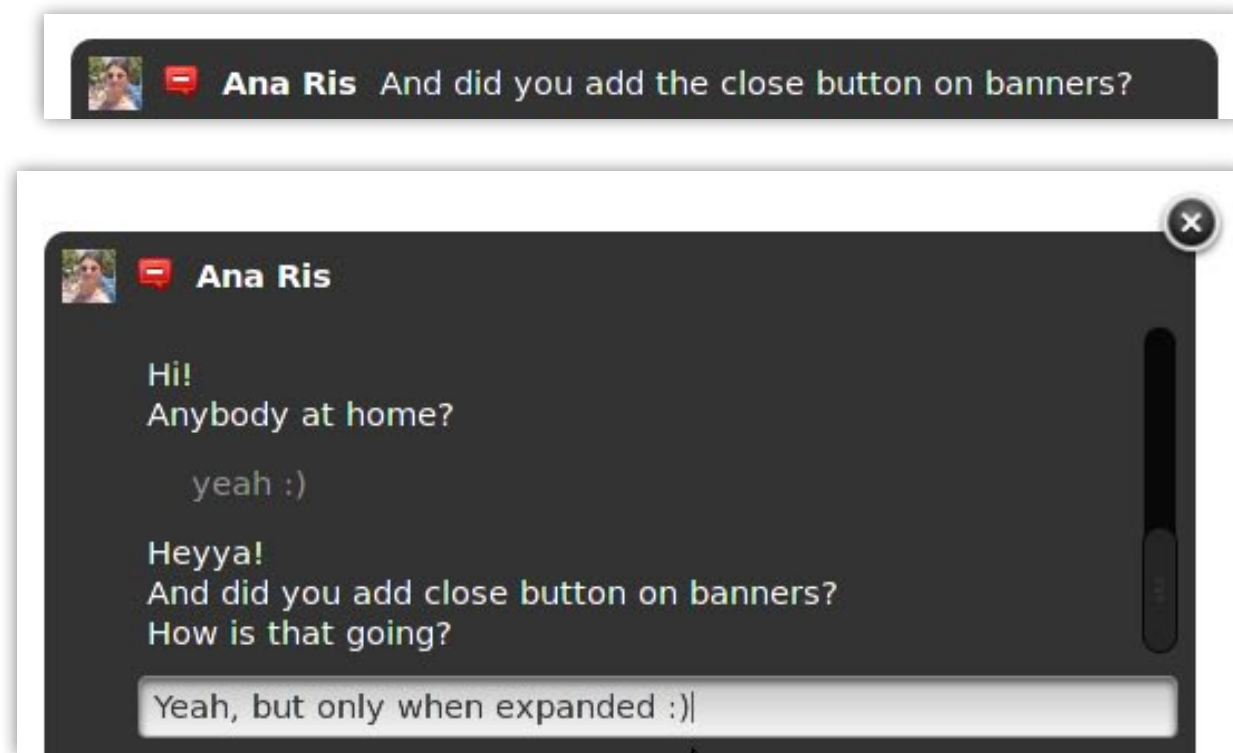

Features

Close button

- close button on expanded banners dismisses the view and removes the notification, unless it is resident;
- close button on the shown summary box pointer removes the notification.

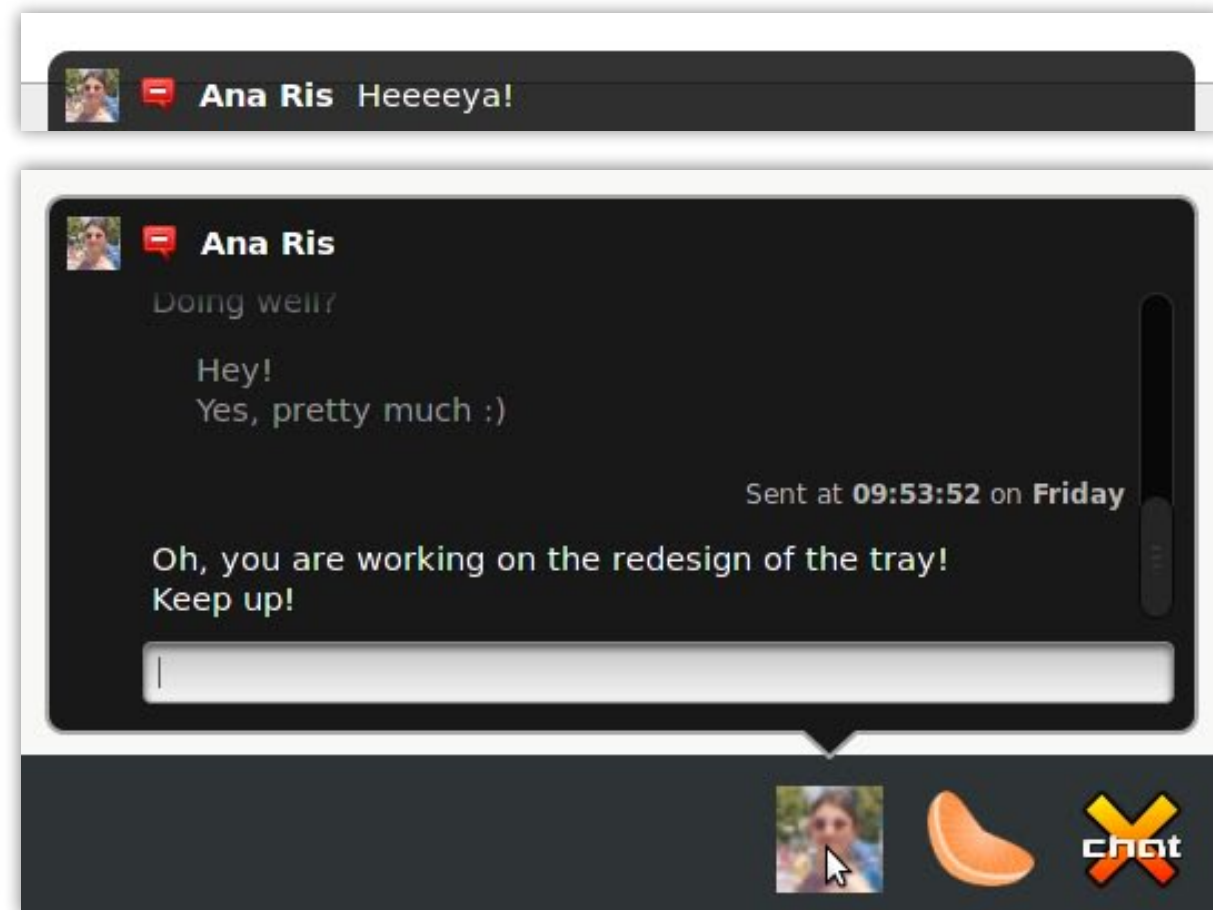

Restyling

Restyle the message tray

- 48px x 48px icons for message tray items without label;
- larger tray with a new background.

No message tray on pop ups

- the message tray isn't supposed to appear when a banner pops up;
- display tray only when it is properly open.

Restyling

No message tray on pop ups
